SUMMARY

Detail-oriented and passionate developer with strong skills in **frontend and backend development** using technologies like **HTML, CSS, JavaScript, TypeScript, React, React Native, Material-UI, Node.js, MySQL, and MongoDB**. Experienced in building **scalable web and mobile applications**, including an e-commerce platform, a **mess management mobile app**, and an **exam hall scheduling system**. Proficient in **creating intuitive user interfaces**, integrating secure **payment gateways**, and optimizing database-driven operations. Dedicated to solving real-world problems through efficient, user-friendly solutions, with a solid academic foundation and hands-on project experience.

KEY SKILLS

HTML | CSS | Bootstrap | JavaScript | TypeScript | React | React Native | Material-UI | Node.js | MySQL | MongoDB

EXPERIENCE

Frontend Developer   April 25 – June 25

BrightLink Info Technologies, Pune

- Built responsive static websites for clients (*Mukund Transgears*, *Deep Clinic Lab*).
- Collaborated with team members to finalize and deliver client projects.
- Designed clean, responsive layouts using HTML, CSS, Bootstrap, and JavaScript.
- Fixed bugs, optimized performance, and contributed to other team projects to deliver polished websites.

PROJECTS

1. PageTurner – Online E-commerce Book Shop

Technology: HTML, CSS, Bootstrap, PHP, MySQL

- Developed a web-based book-selling platform with admin, user, and staff modules.
- Integrated Razorpay for secure online payments.
- Admin can manage books, users, and staff, while staff handles listings and deliveries.
- Users can browse, add to cart, and purchase books easily.

2. Mess Management System (Mobile App)

Technology: React Native, Node.js, Express.js, MongoDB

- Built a mobile-based system to simplify mess selection for hostel students and mess owners.
- Features include real-time menu updates, interest tracking, and secure data management.
- Improved operational efficiency and enabled better decision-making through a user-friendly interface.

3. Exam Hall Management System

Technology: HTML, CSS, Bootstrap, PHP, MySQL

- Designed a system to allocate students, staff, and rooms efficiently during exams.
- Automated hall scheduling and report generation to ease administrative tasks.
- Streamlined administrative tasks and improved overall exam management operations.
